Subject: Table of Organization change request

ITSA requests to make the following changes to our Table of Organization:

- Add 2 System Project Leader positions
- Add 2 System Development Specialist positions
- Eliminate 4 Technical Support Specialists Positions
- Eliminate 1 Network Services Manager position

Attached is a current vs. proposed organizational chart to better illustrate these changes. Our intention is to create a pathway for career advancement for our current tech support specialists while also reducing the supervisor-to-subordinate ratio in the Network Systems Services section.

Additionally, by engaging REJIS to provide higher level network support, we create a more robust posture for ensuring network security than when those responsibilities are contained to one person.

Respectfully submitted for the February 19th Board of E&A agenda,

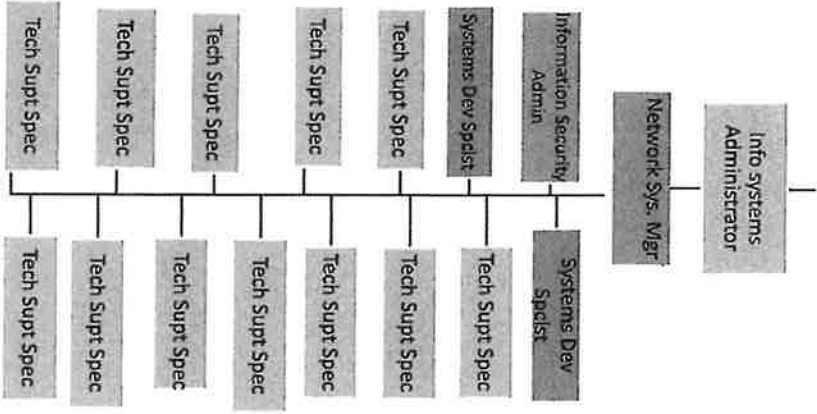

Cindy Riordan
Director, ITSA
